ARE YOU COVERED?

Perishable goods can spoil a supply or distribution channel. For over 60 years, Graphic Controls has provided solutions to record and interpret temperatures, serving industries such as food and beverage, chemical, floral, and pharmaceuticals.

The TrekTag® BT Temperature Data Logger is designed to bring reliability and peace of mind to the customer who requires temperature data they can use to focus on their brand, customers, and bottom line.

Read Distance 100 meters
Can be read up to 100 meters away, through walls and trailers via bluetooth technology

12,000 Data Points
Can be configured to record up to 83 days without contact to upload to the cloud.

IP 65 Rating
Water & dust resistant

Accurate Recording
Accurate within +/- 0.5°

RELIABLE DATA LOGGING:
Scan the TrekTagBT using your edge reader or android device's bluetooth technology. Get an instant report on your smartphone. Upload to the cloud to access from anywhere.

TREKTAG BT SPECIFICATIONS

TrekTag BT allows the reading of tags hundreds of feet away as well as through walls, trailers, containers, cartons and coolers.

The tags can be placed on the outside of a pallet (like traditional loggers) or inside a box or carton with the product. They can also be attached (permanently) to the inside of trailers, containers, or to warehouse/store shelves.

TREKTAG BT FEATURES

- Read distance up to 100 meters
- Read/Write and instantly reusable
- Definable logging intervals from one second to one day
- Continuous logging - No need to activate
- Can hold over 12,000 temperatures between reads
- Multi-year battery life - alkaline or lithium options
- Rugged, water-tight enclosures
- Includes Marking Button for key event tracing
- Unique Bar code and QR Code printed on each logger
- LED indicator shows logger status
- Available with or without mounting tabs
- Optional light detection

TEMPERATURE

Temperature Range: -30ºC ~ +50ºC

Temperature Accuracy: ±0.5ºC
Increased accuracy with individual calibration option

Time Accuracy: ±0.1% error (determined at 5ºC)

POWER SUPPLY

Battery: 2 AAA alkaline standard

Battery Life: 3 to 5 year life
(depending on the use case)

DATA LOGGING

Data Retrieval: Sent directly to Edge Reader or Android Device

Operating Mode: Continuous - no 'blind' spots due to misuse.

Temperature Logging Interval: 10 Minutes Standard
Can be configured from 6 seconds to 12 hours

Storage Points: Up to 12,000 Data Points

REPORT / PRODUCT SPECS

Dimensions: 73mm x 44mm x 20mm

Enclosure: Lexan Polycarbonate

Water/Dust Resistant: IP65 or NEMA 4X
